

The Ethical Workplace

& the Law in Practice

The concept and importance of an Ethical Workplace is not new. However, recent events over the past two years have brought this issue to the fore like never before, and there is increasing pressure on employers to demonstrate their commitment and credentials as an ethical business.

In our ***The Ethical Workplace & The Law in Practice*** series, we address many of the most topical workplace issues organisations are facing across the globe.

We bring together a variety of legal experts and different voices to discuss the ever-changing legal landscape. Issues such as discrimination and harassment, diversity data monitoring and positive action, domestic violence, modern slavery, and mental health are recognised as being at the core of every ethical business. We also address the issue of employee empowerment and expectations of influence on corporate strategy and the opportunities and challenges that this brings.

All these resources can be found on our Ethical Workplace [page](#).

Watch our video summarising the series below.

“Bird & Bird is down to earth and pragmatic, offer solutions rather than just advice, and are happy to roll their sleeves up and get involved in whatever matter is thrown their way. The international network is also very valuable.”
